Know your Vintage?

Do you think you have a pretty good idea of what the 1920-1930's styles look like? Well, I thought I did until I started doing a little research and the result really surprised me. Check it out. The pictures to the right are gleaned from the internet and are a combination of dresses both modern and from the 20-30's era. Look them over, and see if you can tell which is which! Some are the real deal, the modern ones are vintage inspired or just found in a catalog, but currently available for purchase (although for a pretty penny for a couple of them! Ouch!) The answers are below, so you don't have to wait to see how you did!
